SKILLS SUMMARY

- **Programming Languages:** Python, C++, JavaScript
- **Web Development:** HTML, CSS, Bootstrap4, React.js, Vue.js, Node.js, Redux Tool Kit, RTK Query, React Persist, Tailwind
- **Other:** Git & GitHub

EXPERIENCE

- **Senior Frontend Engineer** Pune, Baner
Ecobrium (Full-time) July 2024 - Jan 2025
 - Worked on **React.js** to improve the widget functionality in Ecotribrium SmartSense.
- **Software Engineer** Pune, Baner
Provakil (Full-time) Sept 2022 - July 2024
 - Enhanced **provakil.com** by implementing new features, fixing critical bugs, and optimizing performance.
 - Developed and improved the **configurator**, enabling dynamic event handling, interactive button configurations, and enhanced user control.
 - Refined the **Authority Matrix/Approval Flow** to streamline authorization and approval processes.
 - Utilized **React.js**, **Redux**, and **React Router** (with lazy loading) for efficient state management and smooth navigation.
 - Developed **Python scripts** for **SLA** escalations and bulk imports, while also contributing to **Node.js** backend improvements for seamless React.js integration.
- **Associate Software Engineer** Pune
E-zest (Full-time) Oct 2021 - Sept 2022
 - Developed transformation code for dimensional tables and executed incremental loading using the **DBT Tool** and **Snowflake**.
 - Implemented **Type 1** and **Type 2** changes in Slowly Changing Dimension (SCD) tables.

PROJECTS

Phone Covers E-commerce Website MAR 2025

Personal Project

- Built a web app that allows users to design custom phone covers with **drag-and-drop** image placement, while also providing a collection of pre-added covers managed by admins.
- Implemented **Firebase Authentication** with **Protected Routes** to secure user login and restrict unauthorized access.
- Used **Redux Toolkit** with **React Persist** for efficient state management, ensuring cart data and user sessions persist after refresh.
- Developed a smooth **SPA experience** using **React Router**, with a responsive UI powered by **Tailwind** and **Shadcn components**, and enabled **admin functionality** to add phone covers visible to users.
